How To Do a Correct Push-up Instructions - Original

Introduction:

The push-up is the most well-known exercise that targets one's chest, triceps, shoulders, and core. This guide will explain how beginners can learn the proper push-up form and ultimately be able to perform it with good technique. These instructions are intended for people who are new to bodyweight training and want to live a healthier lifestyle.

Equipment Needed:

- Flat floor surface
- Workout mat
- Comfortable workout clothes

Step by Step Instructions:

1. Position yourself on the floor
    a. Kneel down on the workout mat
    b. Place both hands on the floor slightly wider than shoulder width
2. Extend legs behind you
    a. Straighten both legs so your body forms a straight line
3. Align your body
    a. Keep back straight
    b. Tighten core muscles
    c. Avoid letting hips drop
4. Slowly bend your elbows
    a. Lower your body toward the floor by bending your elbows
    b. Keep elbows at a slight angled sightly back, rather than flaring them outward
5. Lower your chest to the ground
    a. Continue lowering your elbows until your chest is a few inches away from the mat
6. Briefly pause in the bottom position
    a. Hold the position for about one second
    b. Maintain a straight line with your body
7. Push your body up
    a. Press through the palms of your hand
    b. Flex your chest muscles until you reach the upward position
8. Repeat the movement

a. Perform multiple repetitions in a controlled pace

Conclusion

Beginners can learn how to do the proper push-up form by following these steps, which will help them avoid injuries and promote a healthy lifestyle. This exercise builds strength in the chest, arms, core, and shoulders, ultimately improving muscle endurance. If the standard push-up is too challenging, try starting with your knees on the mat. This change reduces the difficulty, allowing you to build the necessary strength to eventually perform a full push-up.

How To Do a Correct Push-up Instructions – Revised

Equipment Needed:

- Flat floor surface
- Workout mat
- Comfortable workout clothes

Step by Step Instructions:

Step 1 - Place the workout mat flat on a flat surface

Step 2 - Kneel on the workout mat

Step 3 – Place both hands on the mat slightly wider than your shoulders and in front of your knees

Step 4 – Straighten both of your legs back, making sure only your toes are touching the mat

Step 5 – Tighten your core muscles to keep your body in a straight line
